

AGPM Q&A: What should I enroll in for Spring 2021

Are you a first year (frosh or junior transfer)?

Yes

Frosh

Prioritize **CMPM 80K** and **CSE 20** or **CSE 30**, depending on where you are at with your programming courses. If you haven't yet taken **ARTG 80I**, you can try enrolling in that as well.

If you have already taken the courses above, you should take a Lower Div Arts, HAVC elective, or a GE instead.

Junior Transfer

You must enroll in: **ARTG 120 & CMPM 120** (unless you are planning to take them in the summer)

You should try to take a **major elective** as your third course.

No

Are you a 2nd or 3rd year?

No

Then you are most likely a 4th or 5th year!

If you enrolled in ARTG 171 in Winter, make sure you enroll in **ARTG 172** for Spring along with any missing **major electives** you still have.

If you are planning to graduate in Spring 2021, this would also be a good time to meet with your college advising office to make sure that you will have a total of 180 units + all of your GE's completed by that time. If you have questions about your AGPM major requirements or would like me to do a graduation check for you, please let me know!

Yes

You should consider taking some **major electives** or any **GE's** that you have remaining.

No

You should consider enrolling in major declaration courses like: **ARTG 80I**, **CMPM 80K** (...or CSE 20/CSE 30 depending on where you are at with your programming courses).
